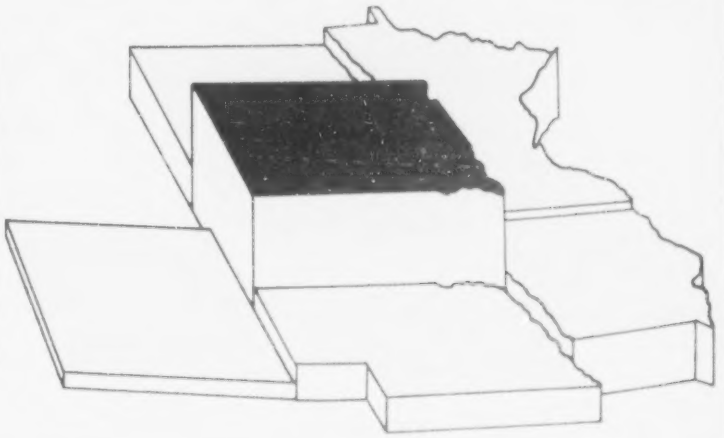
SOUTH DAKOTA
Data Supplement

November 1986
Vol.III, No.5



Published by Business Research Bureau, The University of South Dakota

* SOUTH DAKOTA'S BIMONTHLY RETAIL SALES PERFORMANCE FOR JULY-AUGUST EXCEEDS NATIONAL GROWTH RATE FOR SECOND STRAIGHT BIMONTHLY
* GROWTH IN MINNEHAHA AND PENNINGTON AVERAGES 9.4% - PENNINGTON LEADS THE BIG TWO WITH A 13.1% GROWTH RATE
* NEXT EIGHT COUNTIES' AND RURAL COUNTIES' PERFORMANCE ABOVE NATIONAL AVERAGE

The state's retail sales performance in the July-August bimonthly reporting period for all three reporting levels is stronger than the national performance for the second consecutive bimonthly and getting stronger. The state's main street businesspeople (all utility receipts are not included) shared in a growth of 6.6 percent. The top two, next eight and other counties recorded increases of 9.4, 4.3 and 4.6 percent, respectively.

Of the big two, Pennington County was more than twice that of Minnehaha. Pennington reported a 13.1 percent growth in retail sales. Minnehaha had an increase of 6.4 percent. Both counties exceeded the national growth rate of 3.8 percent. Pennington showed strength in the goods and services sectors with few exceptions. Apparel and accessories were down in the goods sector. Personal services were off and business services were down in the double digits. Minnehaha's sales of goods were positive with a couple of exceptions. The apparel and accessory sector registered a decline as it did in Pennington County. Furniture sales were off in Minnehaha while Pennington experienced growth. Interestingly, Pennington is the big kid on the block in the service sector with its sales of services exceeding those in Minnehaha. This was not the case one year ago. Pennington also narrowed the gap in the sale of goods. *Continued on page 8*

TRENDS IN THE SOUTH DAKOTA ECONOMY

by
Jeff M. Peters

The following graphs examine three dimensions of South Dakota personal income and SD retail sales growth. In the first graph, variations in SD real personal income are compared with a trend line. Historically, personal income in South Dakota has grown at a rate of 3.2 percent per year. Overall, South Dakota's real personal income has fluctuated below the national trend with the exception of years 1973 and 1974 where SD personal income rose well above the expected trend due to the farm boom. From 1958 to 1972, real personal income fluctuated mildly whereas sharp swings have occurred in the last decade. Since 1980, South Dakota real personal income has generally been below trend.

In the second graph, the index of real personal income in SD is compared with the US index. Note the historical pattern of the SD index is quite similar, but SD real personal income is more volatile than US real personal income. Note also that during this historical period, South Dakota real personal income has not grown as rapidly as US real personal income.

The third graph indicates the share of total personal income in South Dakota accounted for by agriculture. From 1958 to 1974, the percentage of personal income originating from the farm sector constituted approximately 15 to 25 percent of SD personal income with the exception of years 1959 and 1973. Between 1975 and 1985, this percentage fluctuated from 5 to 15 percent except in years 1976 and 1983.

The last graph shows the percentage change in SD retail sales in the ten largest counties vs the other fifty-five counties. From 1977 to 1982, there has been a close relationship between the two if not an exact same percentage change. In 1982, growth in retail sales started recovering while the other counties' growth started to stagnate. The largest counties' growth peaked at 9 percent in 1984 and declined sharply to 4 percent in 1985. The other fifty-five counties dropped from 4 percent growth in 1984 to -1 pecent in 1985.

Published by Business Research Bureau, The University of South Dakota

Continued from page 1

The next eight counties of the top ten, the top ten less Pennington and Minnehaha, show continued strengthening in the sale of building materials. Furniture sales are strong. Personal and business services are off this bimonthly in double digit amounts but this follows strong spending throughout the first half of this year with growth rates well into the double digits.

With the exception of furniture, the other counties are stronger across the board. This is the second reporting period for weakness in furniture in this group. Business services have grown by double digits for the past three bimonthly periods and sales are up for the last two.

National retail sales increased at the rate of 5.9 percent for the September-October bimonthly period. The national index of consumer sentiment for the period decreased from 97.7 in July to 91.9 in September.

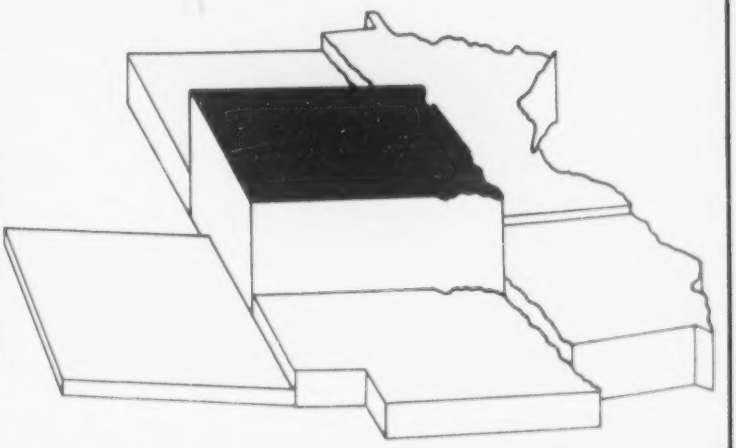
SOUTH DAKOTA Data Supplement

January 1987
Vol.III, No.6



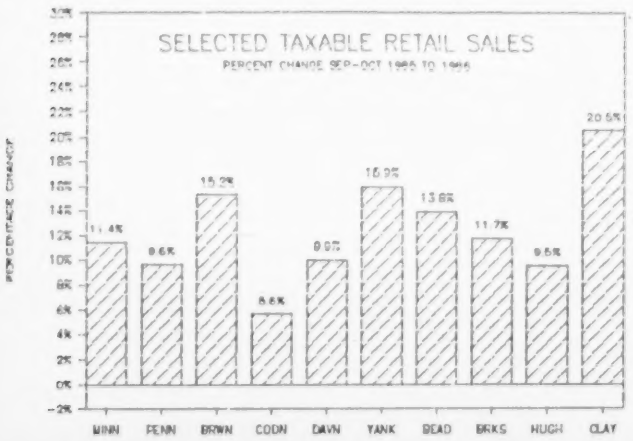
Published by Business Research Bureau, The University of South Dakota

* SOUTH DAKOTA'S BIMONTHLY RETAIL SALES PERFORMANCE EXCEEDS NATIONAL GROWTH RATE AGAIN THIS BIMONTHLY FOR A TOTAL OF SIX MONTHS RUNNING.
* COUNTIES OF THE TOP TEN CITIES GREW AT A RATE OF 11.2% - WELL ABOVE THE NATIONAL GROWTH RATE.
* COUNTIES OTHER THAN THE TOP TEN RECORD THIRD BIMONTHLY OF POSITIVE GROWTH.

Randall M. Stuefen

Main street taxable sales in the state grew at the rate of 8.9% in the September-October bimonthly reporting period which is well above the nation's overall growth rate of 6.9% for that period. The top ten counties performed at the exceptional pace of 11.2%. Clay county led the pack with sales 20.5% above the 1985 level. Six of the ten counties had double-digit growth rates. The top two counties averaged 10.7% and the next eight recorded growth of 12.2%.

Minnehaha edged out Pennington this bimonthly with growth rates of 11.4% and 9.6% respectively. Both led the national growth rate of 6.9%. Both counties experienced double-digit growth in the building materials sector.



General merchandise stores had increased sales of over 18% in both counties. General merchandise stores have been strong throughout 1986 with the exception of the first bimonthly. Interestingly, general merchandise stores—department stores—have done well throughout the year while both counties have had declines in apparel and accessory throughout the year. The trend begs the question of changing shopping habits.

The next eight counties of the top ten, the top ten less Pennington and Minnehaha, show a broad based strengthening

with double digit growth the rule and single digit growth the exception. Building materials, general merchandise, eating and drinking, and furniture sales are all strong. Apparel and accessory is up 7.1% for this group and though weak has been positive in 1986 with one exception.

The other counties experienced strong performance in building materials, apparel and accessory, eating and drinking, and general merchandise. Furniture sales for this group continue to decline and likely reflect worsened business conditions as well as closing of some stores.

The national retail sales increased at the rate of 6.4% for the November-December bimonthly period. The national index of consumer sentiment for the period decreased from 91.9 in September to 91.4 in November.

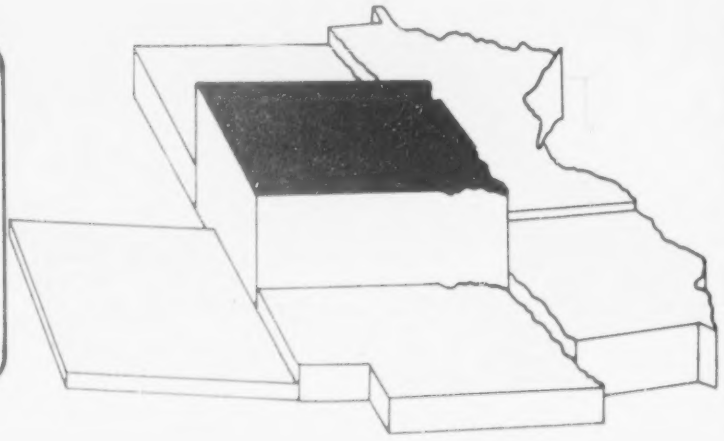
SOUTH DAKOTA
Data Supplement

March 1987
Vol. IV, No. 1



Published by Business Research Bureau, The University of South Dakota

- **SOUTH DAKOTA'S BIMONTHLY RETAIL SALES PERFORMANCE EXCEEDS NATIONAL GROWTH RATE FOR THE FOURTH BIMONTHLY IN A ROW**
- **COUNTIES OF THE TOP TEN CITIES REPEAT THE LAST BIMONTHLIES FAVORABLE GROWTH RATE OF 11.2% - THIRD BIMONTHLY WELL ABOVE THE NATIONAL GROWTH RATE**
- **COUNTIES OTHER THAN THE TOP TEN RECORD A DECREASE AFTER THREE BIMONTHLIES OF POSITIVE GROWTH**

Taxable sales on the state's mainstreets were up 7.7% in the 1986 Christmas bimonthly of November and December. That performance level exceeded the nation's bimonthly increase of 6.6% by 1.1%. The top ten counties performed at the exceptional pace of 11.2% for the second straight bimonthly period. Not one of the top ten counties' sales were down. Yankton county was the biggest gainer with sales 16.2% above the same period in 1985. The top two counties' growth rate averaged 13.5% and the next eight recorded growth of 7.7%.

Oh, what a Christmas! Business in the big two performed with an average growth rate of 13.5% — nearly double the national growth rate. Of the two, Pennington was the better performer edging past Minnehaha's rate of growth rate 14.6% to 12.9%. Building materials in Pennington were up 71.0%. General merchandise was up 19.4%, eating and drinking increased 15.5%, and furniture was up 17.5%. Food sales were down 5.9%. Building material sales increased a respectable 13.8% in Minnehaha. General merchandise was up 23.4%, food store sales were up 2.2%, eating and drinking was up 17.4%, and furniture increased 12.1%. Apparel and accessory continued off with a decline of 25.8%.

TRENDS IN THE SOUTH DAKOTA ECONOMY

by
Jeff M. Peters

The four graphs shown below provide comparisons of South Dakota and U.S. key economic variables. In the first graph, quarterly variations in South Dakota personal income are compared with a trend line.[1] Since 1958.8, South Dakota real personal income has grown at a historical rate of 3.3 percent per year. In 1973 and 1974, personal income rose well above the trend due to the boom in the farm sector. With exception to 1979.3, real personal income has fluctuated below the trend since 1975. The downward trend experienced during the four quarters of 1985 and the first quarter of 1986 was reversed in the second quarter of 1986. In the third quarter of 1986, South Dakota real personal income fell back to the first quarter level.

The index of real personal income in South Dakota is compared to the United States in the second graph. Overall, the South Dakota index has been very volatile as compared to the smoother growth pattern of U.S. real personal income. South Dakota personal income has not grown as rapidly as U.S. personal income during this historical period.

The third graph indicates the percent of South Dakota total personal income derived by the farm sector. From 1958 through 1974, farm personal income averaged 21 percent of total personal income. During 1974, the share of personal income accounted for by agriculture dropped by 21 percent. This was the largest decline experienced since 1958. From 1975.1 through 1986.3, farm personal income averaged only 9 percent of total South Dakota personal income.

In the last graph, the index of South Dakota non-agricultural employment is compared with the U.S. index. South Dakota and U.S. non-ag employment experienced approximately the same growth during 1975 and 1978. South Dakota deviated from the U.S. trend in 1979. From 1979 through 1983, South Dakota experienced the same movement in non-agricultural employment as the U.S. Since 1984, non-farm employment has leveled off while the U.S. non-farm equipment continues to rise from the trough encountered in 1983.

[1]The trend line was computed by fitting a quadratic trend from 1958.1 through 1979.4.

Continued from page 1

The next eight counties of the top ten, the top ten less Pennington and Minnehaha, show a broad based strengthening. Standouts this period include furniture sales and eating and drinking sales with growth rates of 22.5% and 15.9%, respectively. Building materials were up 8.1%, food was up 5.1%, apparel and accessory was up 7.2%, and general merchandise was up 2.6%.

The other counties experienced strong performance in building materials, apparel and accessory and eating and drinking with respective growth rates of 17.0%, 8.4%, and 13.0%. Furniture sales for this group continued to decline and finished the year with continuous losses throughout the twelve month period.

The national retail sales increased at the rate of 2.3% for the January-February 1987 bimonthly period. The national index of consumer sentiment for the period decreased from 91.4 in November to 90.4 in January.

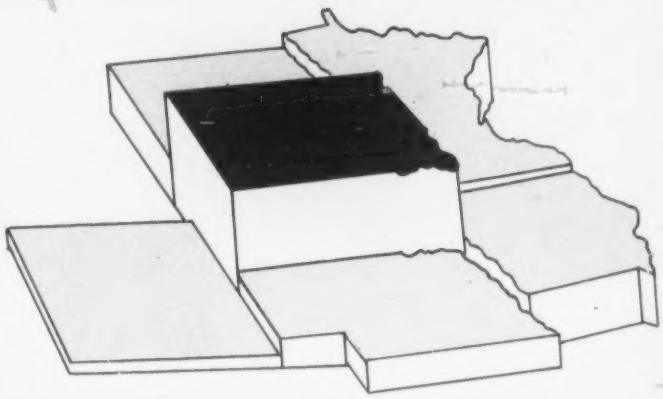
SOUTH DAKOTA
Data Supplement

May 1987
Vol. IV, No. 2



Published by Business Research Bureau, The University of South Dakota

* STATE'S BIMONTHLY RETAIL SALES PERFORMANCE FOR JANUARY-FEBRUARY EXCEEDS NATIONAL GROWTH RATE

* GROWTH IN COUNTIES OF TOP TEN CITIES AVERAGES 10.1% - BROWN COUNTY LEADS THE PACK WITH INCREASE OF 22.1%

* RURAL COUNTIES PERFORMANCE DOWN 1.0%

The state's retail sales performance has exceeded the national level of performance for the past ten months. The ten larger communities' mainstreets shared in a growth of 10.1 percent. The remainder of the state experienced a decline in sales of 1.0 percent. The concept of a Dual Economy in South Dakota continues to be supported.

The big two, Pennington and Minnehaha, averaged 9.6 percent. Pennington was the leader, reporting a 11.9 percent growth in retail sales. Minnehaha recorded an increase of 8.2 percent. Both counties exceeded the national growth rate of 3.1 percent.

The next eight counties of the top ten, the top ten less Pennington and Minnehaha, outperformed the top two by over 1.0 percent with a growth rate of 10.7 percent. However, the star of the group was Brown county with a blistering 22.1 percent rate of growth. Yankton and Clay counties round out the group of double-digit performers with increases of 12.4 percent and 10.8 percent, respectively.

The other counties 1.0 percent drop is not good news but the negative performance level must be put into context. Building material sales were up 11.3 percent. General merchandise sales were up 19.8 percent. Food sales, apparel and accessory, furniture, and eating and drinking were up 1.3 percent, 2.0 percent, 5.0 percent and 9.2 percent, respectively. Several of the service sectors showed improvement while a few slipped. Why then the drop you say? Computer programing is underway to answer the question.

The national retail sales increased at the rate of 6.9 percent in the March-April bimonthly period. The national index of consumer sentiment increased from 90.4 in January to 90.8 in March.

TRENDS IN THE SOUTH DAKOTA ECONOMY

by
Brian J. Brown

The following graphs illustrate the trends in economic growth in the US and SD from 1976 to 1986. Throughout the mid 1980s the patterns in both the US and SD economies have closely resembled one another. The one exception to this has been in the unemployment rate, which, in SD, has fluctuated from about 4.5 percent in 1984 to about 6 percent in 1983 and 1985. At the same time, unemployment in the US has remained around 7.5 percent. SD unemployment steadily decreased to approximately 4 percent by the second quarter of 1986 although it began to rise again in the third quarter. SD real personal income rose sharply in the second quarter of 1986 from 7 to 7.7 billion dollars, mainly because of an increase in deficiency payments. Such was also the case with real farm income, which increased to 1.25 billion during the same period. Non-ag employment remained relatively constant in SD during 1986, increasing only slightly in the third quarter. For the most part, however, SD economic growth in 1986 paralleled that of the US.

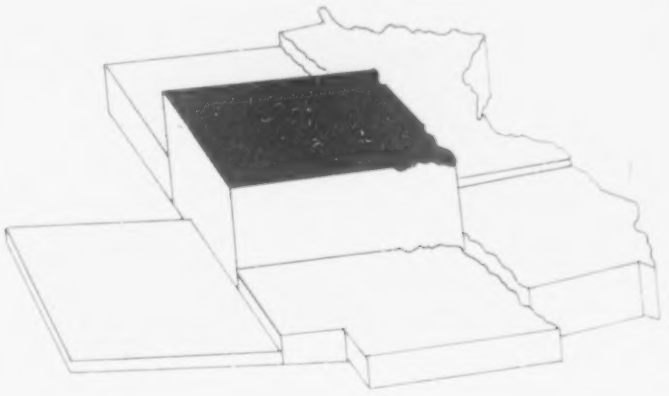
SOUTH DAKOTA Data Supplement

July 1987
Vol. IV, No. 3



Published by Business Research Bureau, The University of South Dakota

* **SOUTH DAKOTA'S BIMONTHLY RETAIL SALES PERFORM STRONG -- WELL AHEAD OF THE NATIONAL PERFORMANCE LEVEL**
* **COUNTIES OF THE TEN LARGEST CITIES SCORE FOURTH CONSECUTIVE BIMONTHLY OF DOUBLE DIGIT GROWTH**
* **OTHER COUNTIES' PERFORMANCE LEVEL REBOUNDS FROM NEGATIVE GROWTH IN LAST TWO PERIODS TO AN 8.7 PERCENT GAIN**

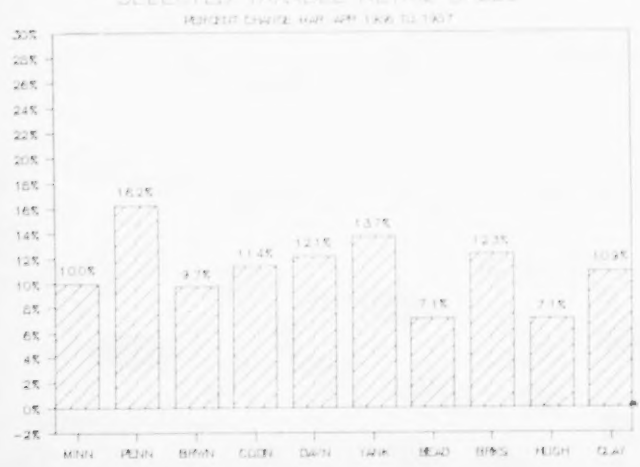
By Randall M. Stuefen

The nation's retail sales continue slow. Economists are blaming the cooling national performance figures on a debt-laden consumer. The much broader national retail sales figures include auto sales and would have fared worse had they been excluded.

The state's March-April retail sales grew 10.8 percent compared to the same period in 1986. The sales in the counties of the top ten improved from 10.1 to 11.6 percent but the real news is in the more rural counties. The counties other than the top ten leaped from a negative rate of growth last bimonthly to an 8.7 percent gain this bimonthly. A long retail sales dry spell in the rural counties has turned around with some relief.

Of the top ten counties, Pennington county was the outstanding performer with increased retail sales of 16.2 percent. Not far behind, Minnehaha, Codington, Davison, Yankton, Brookings and Clay all recorded sales in the double digits. The slowest of the big ten out-performed the nation.

Pennington and Minnehaha both experienced general growth with few exceptions. One exception for Pennington and a major distinction from Minnehaha was performance in the building materials sector. Pennington was down 3.6 percent while Minnehaha was up nearly 31 percent. Minnehaha's poor performance relative to Pennington was in the lodging sector. It was down 2.8 percent while Pennington was up 17.3 percent. Services out-performed the retail sale goods category in both counties for the period.



BIMONTHLY PERIODS	MAY-JUN 1985	JUL-AUG 1986	SEP-OCT 1986	NOV-DEC 1986	JAN-FEB 1987	MAR-APR 1987

SOUTH DAKOTA OUTLOOK

Slow growth will dominate South Dakota's economic picture for most of 1987. Real personal income will increase annually by only 1%, compared to a 4% rate of growth in 1986. This difference is due not so much to a change in overall economic growth as it is to the timing of deficiency payments made to farmers. These payments, last made during the fourth quarter of 1986 and the first quarter of 1987, account for the substantial increases in real farm income in each of these periods.

Much of the growth in real nonfarm personal income will result from the manufacturing of durable goods. Personal income generated by durable manufactures will rise 6.7%. Income from manufacturing will rise by 6.4%. Personal income will grow by 5% in the services sector. Real wages and salaries will grow by 1.2%. These numbers should increase slightly in 1988 when real personal income increases by 2.4% and real nonfarm personal income increases by 1.9%.

Total employment and non-ag employment will increase by 2.2% and 1.9% respectively in 1987. In 1988 total employment shall increase by .1%, and non-ag employment will increase by 1.4%. The largest share of the increase in non-ag employment will be in the area of contract construction, which will rise from 9.7 thousand in 1986 to 10.9 thousand in 1987---an increase of 12.3%. This is due mainly to the extremely mild weather and work on Ellsworth Airforce Base. Services employment will increase by 1.2 thousand resulting in an annual figure of 61.2 thousand. Services employment shall further rise to 62.3 thousand in 1988. At the same time, however, manufacturing employment will increase slightly from 28.3 thousand in 1986 to 29.0 thousand in 1987. The increase in employment will be responsible in pushing the annual unemployment rate down down from 4.7% to 4.1%. South Dakota's annual unemployment rate for 1988 will be 4.3%.

South Dakota's annual insured unemployment rate will be 1.4% in 1987 and 1.6% in 1988. South Dakota's unemployment insurance system is in good shape with UI contributions exceeding total benefits paid. In 1987 UI contributions will total $14.91 million, exceeding total benefits paid by $3.11 million.

UI contributions will grow to $15.20 million by the end of 1988, while benefits paid will only rise to $12.62 million. Finally, the unemployment trust fund will maintain a balance of $44.12 million for 1987 and $50.34 million for 1988.

continued from page 1

The next eight counties of the top ten had growth across the board with the exception of motion pictures. Building materials were up 21.1 percent. General merchandise increased 16.6 percent. Food stores experienced one of the smallest increases with a growth rate of 4.9 percent.

The other counties' growth was nearly as broad as the counties with the larger communities. Building materials were up 17.7 percent. Furniture sales were up 17.6 percent. Apparel and accessory sales were down slightly, as were amusement and recreation receipts.

National retail sales for the May-June bimonthly period increased at a rate of 4.3 percent. The national index of consumer sentiment for the period increased slightly from 90.8 in March to 91.1 in May. The index one year ago May was 94.8. Heavy consumer debt and the changed tax laws -- consumer credit not deductible -- may be having an effect.

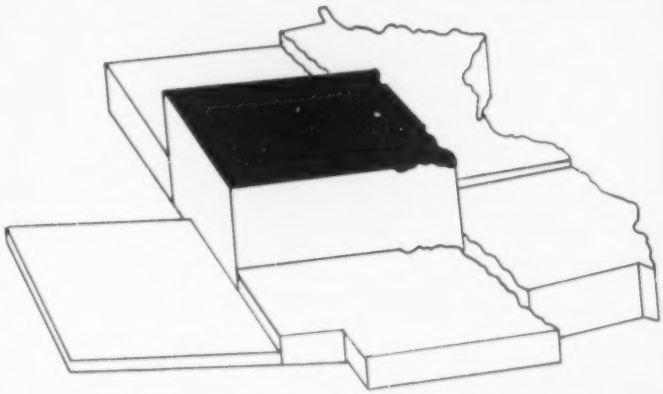
SOUTH DAKOTA Data Supplement

September 1987
Vol. IV, No. 4



Published by Business Research Bureau, The University of South Dakota

* STATE'S BIMONTHLY RETAIL SALES PERFORMANCE FOR MAY-JUNE EXCEEDS NATIONAL GROWTH RATE — 14 MONTHS OF PERFORMANCE STRONGER THAN THE NATIONAL RETAIL SALES GROWTH RATE

* GROWTH IN COUNTIES OF TOP TEN CITIES AVERAGES 5.4%

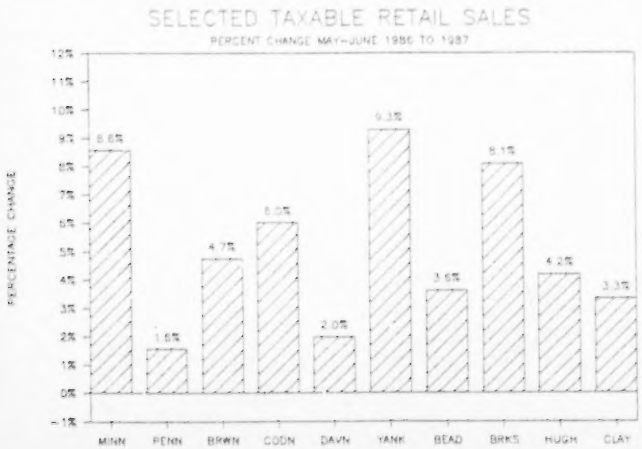
* RURAL COUNTIES' RETAIL SALES UP 4.5%

The state's May-June retail sales performance exceeded the national level of performance by a slim one-tenth of one percent. The state's performance has now outperformed the nation for seven bimonthly periods representing 14 months of retail sales. The consumer's influence on the nation's longest uninterupted period of economic growth is not as strong as it has been. In South Dakota, it appears that the more rural counties are benefiting from a brief boost in agricultural income in the form of increased subsidies and improved prices.

The Bureau of Economic Analysis reported that farm subsidies nationally were up significantly in the first quarter due ". . . largely to final deficiency payments on 1986 crops and initial deficiency payments on 1987 crops." Nationally in the first quarter of 1987, 20 billion of the 51.5 billion dollars of farm proprietors' income was subsidy. The subsidies declined 11.5 billion dollars in the second quarter of 1987. Income from other than farm subsidies offset the loss. The report explains that "Crop prices were up even more than in the first quarter, and livestock prices increased after a decline." (Survey of Current Business, July 1987, Volume 67, Number 7, p.5)

Retail sales of good and services were up across South Dakota. A major contrast between the top ten counties and the other counties is the relative performance of the goods as opposed to the service sectors. In the top ten counties, the retailing of services dramatically outperformed the sale of goods. In the other counties, the sale of goods outperformed services although the difference in performance isn't as pronounced in the latter.

The performance leader in the top ten this bimonthly is Yankton with an increase of 9.3 percent. Yankton has a good start on the year. It led the top-ten for the first six months of 1987 with an increase of 11.6 percent over the same period last year.



BIMONTHLY PERIODS	JUL-AUG 1986	SEP-OCT 1986	NOV-DEC 1986	JAN-FEB 1987	MAR-APR 1987	MAY-JUN 1987

continued from page 1

Minnehaha came in second this bimonthly with an increase of 8.6 percent. Brookings was the third outstanding performer this period with a growth rate of 8.1 percent.

The increases statewide in the sale of goods were as follows: building materials up 3.1%, general merchandise 7.9%, food stores 3.9%, automotive dealer parts and repairs 4.0%, apparel and accessory 1.9%, furniture 9.5%, eating and drinking 7.4%, and miscellaneous businesses were up 8.0%. services performance levels were: hotel and motel up 8.9%, personal services 1.2%, business services 20.8%, motion pictures 22.2%, and amusement and recreation was up 9.3%.

The national retail sales increased at the rate of 5.3 percent in the July-August bimonthly period. The national index of consumer sentiment increased from 91.1 in May to 93.7 in July. Some economists are seeing more confidence in long term national business conditions and buying attitudes as reasons for the increase.
